Tropical Weather Awareness

Tropical Weather Outlook NWS National Hurricane Center Miami FL 800 AM EDT Tue Aug 8 2017 For the North Atlantic...Caribbean Sea and the Gulf of Mexico: The National Hurricane Center is issuing advisories on Tropical Storm Franklin, located inland over the Yucatan peninsula. A trough of low pressure located about 800 miles east of the Lesser Antilles continues to produce an area of disorganized showers and thunderstorms. Development of this system is not expected during the next few days due to unfavorable environmental conditions. However, some development of this system is possible this weekend while the system moves generally west-northwestward at about 15 mph over the western Atlantic. * Formation chance through 48 hours...low...near 0 percent. * Formation chance through 5 days...low...30 percent.

Weather Forecast

Wind Speeds

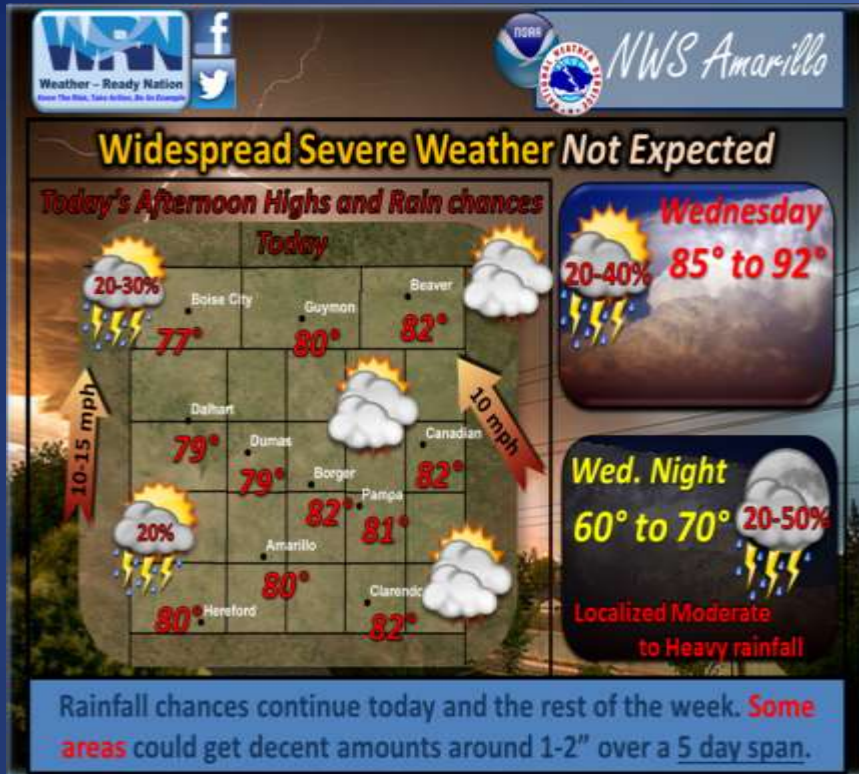

Gusts

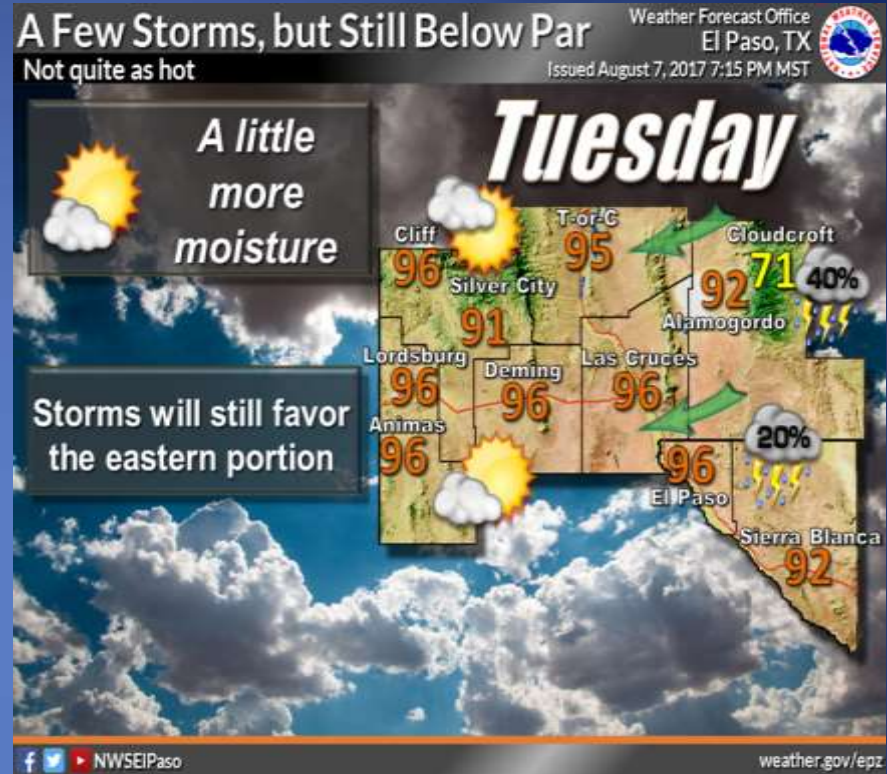

Hazardous Weather

Hazardous Weather

Chances for thunderstorms continue through the next several days. Appreciable rainfall looks likely for portions of the forecast area over the next several days.

Low level moisture will again push in from the east, but most of the area will be under the suppression of high pressure aloft which will "put a lid" on any storms that try to form. The exception would be east of the Rio Grande and over the mountains (especially the Sacramento range) where it will be a little more unstable. Elsewhere the struggle may be too much for wannabe storms to overcome.

Hazardous Weather

Cool with Storms Possible

Locally heavy rain may accompany some storms

Weather Forecast Office

Midland/Odessa, TX

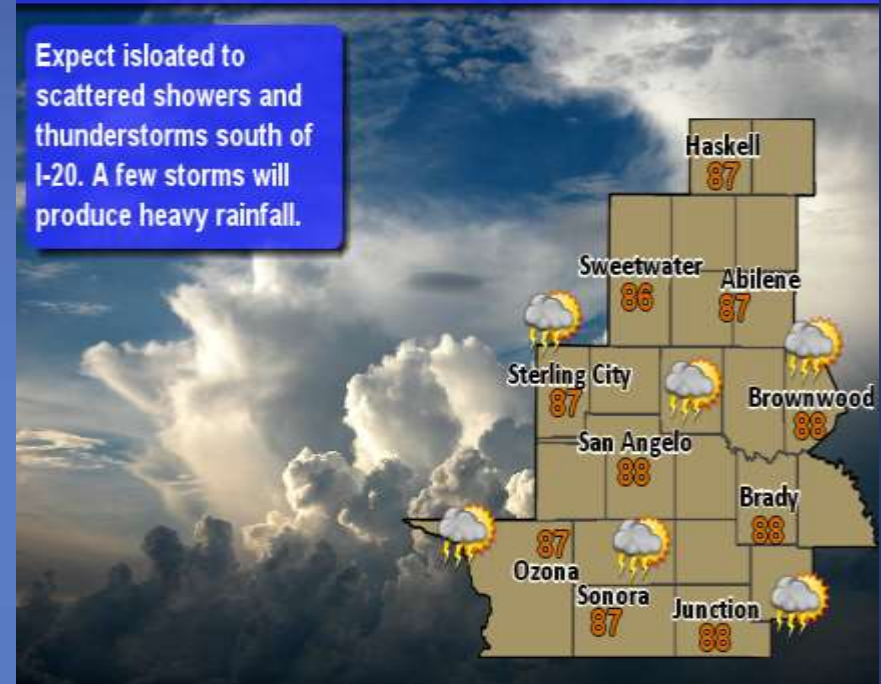

Issued August 8, 2017 4:59 AM CT

Showers and thunderstorms remain in the forecast today, with locally heavy rainfall, gusty winds, and lightning the primary threats. Mostly cloudy skies will keep temperatures in the 80s for most, confining temperatures in the 90s to the Rio Grande Valley.

Today

Expect isolated to scattered showers and thunderstorms south of I-20. A few storms will produce heavy rainfall.

Expect isolated to scattered showers and thunderstorms south of I-20. A few storms will produce heavy rainfall.

Hazardous Weather

Low Rain Chances Linger Through Mid Week

National Weather Service Fort Worth

Each day will see at least isolated showers/storms. Best chances in the southeast
Today and Wednesday. No severe weather. Brief heavy rainfall possible.

Highs Today 85-90

Highs Wednesday 88-92

Highs Thursday 91-96

Heat Indices 100-105

545 AM CDT
Tue Aug 8 2017
National Weather Service
Fort Worth, TX

A weak disturbance over Southeast Texas will continued, mainly afternoon/evening scattered showers and storms across eastern parts of Central Texas, with isolated coverage further northwest today and Wednesday. The upper ridge will intensifies on Thursday with just isolated showers and storms across the Red River Valley and far eastern counties. Gusty winds, lightning, and brief heavy downpours are expected to be the main hazards each day. Severe weather is not expected with high temperatures slowly climbing each day.

Regional Outlook

08/08/2017

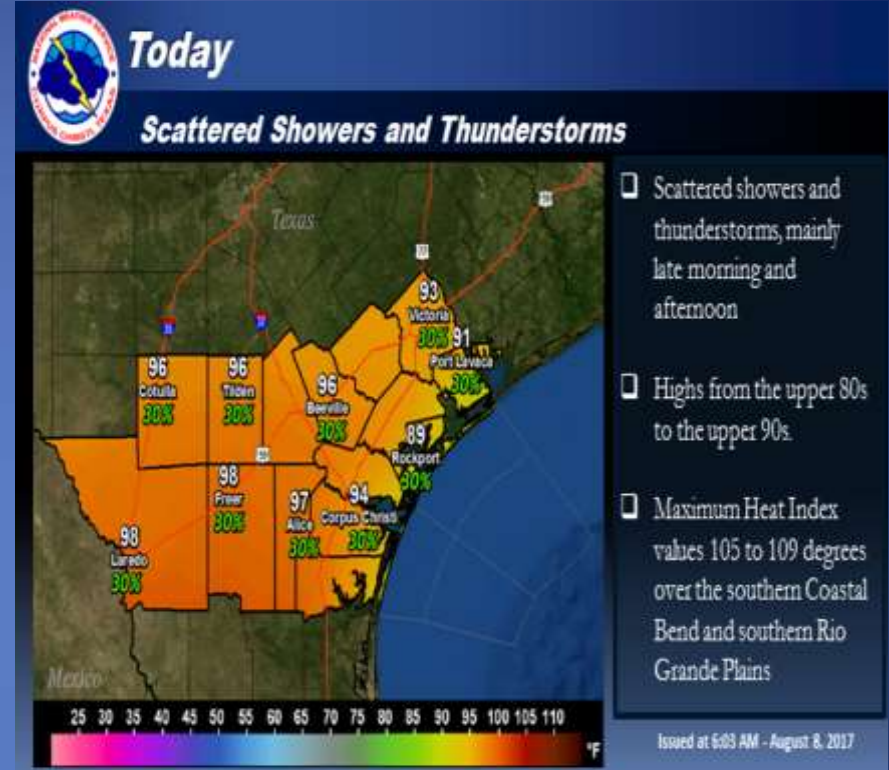

Broken Bow	Texarkana	El Dorado	Tyler	Shreveport	Monroe	Natchitoches	Lufkin
Today	Today	Today	Today	Today	Today	Today	Today
	20%	40%	30%	50%	70%	70%	60%
85	83	81	85	84	83	84	84
Tonight	Tonight	Tonight	Tonight	Tonight	Tonight	Tonight	Tonight
		30%	20%	30%	40%	40%	30%
68	70	69	71	73	72	72	73

Scattered showers and thunderstorms will be possible near a frontal boundary today. Extensive cloud cover and anticipated rainfall will lead to another below seasonal normal day. Tonight, should see a wane in precipitation coverage though portions of deep East TX will have the best shot of receiving precipitation.

Hazardous Weather

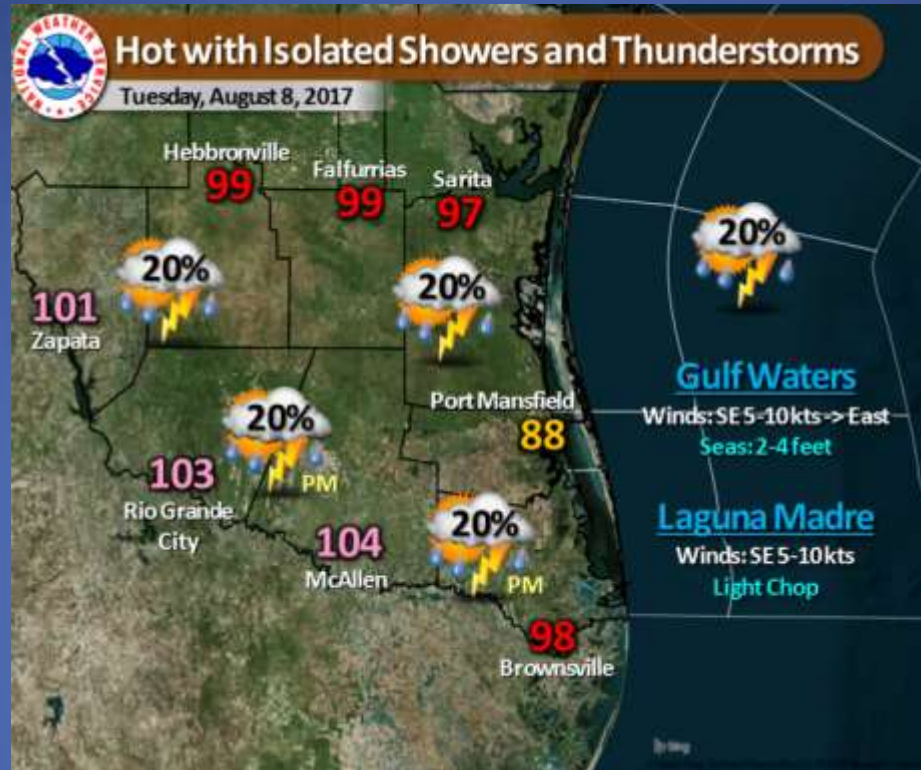

Scattered showers and a few thunderstorms are expected across South Central Texas. Locally heavy downpours are possible. High temperatures will be slightly below normal, ranging from the mid 80s in the Hill Country to mid 90s Coastal and Rio Grande Plains.

Isolated to scattered showers and thunderstorms expected Today. Highs in the upper 80s to the upper 90s. Maximum Heat Index values 105 to 109F over the southern Coastal Bend and southern Rio Grande Plains

Hazardous Weather

Isolated showers and thunderstorms possible across the region today with mainly afternoon chances for the Rio Grande Valley. Afternoon high temperatures will range from the mid and upper 90s to a few degrees beyond 100, with near record highs for portions of the mid and upper valley. Mariners and expect a light chop on the bay with Gulf seas of 2-4 feet. Remember, When Thunder Roars, Go Indoors!
